

Checklist for print

- Make sure all the typography used is in outlines (cmd+shift+o, ctrl+shift+o).
- When embedding images make sure they are around 300dpi and are included in the file.
- Save the file twice, one with the outlines layer turned on and one without.
- Save it as .PDF with the PDF/X-4:2008 preset. Make sure print marks, bleed marks etc. are turned off.
- Hide the *Instructions* layer.
- 

Redline is cutline    Blackline is for bleed
